AUDIT EXECUTIVE SUMMARY:

The facility includes approximately 20000 square feet of cooler space located in the Chicago Produce Terminal Market. There are 6 coolers along with a rented cooler used for re-packing of assorted fruits/vegetables(split case and quality inspections). Iced product can be received and is stored in cooler #2. No making of ice or topping of product occurs on site. During re-packing, commodities are removed from original containers and re-packed into smaller bags, or corrugated boxes for splitting of cases. Assorted vegetables are inspected for quality where rots are removed, and items are placed back into original boxes. Garlic re-packing was observed on the day of the audit. Products are removed from original containers, weighed where needed and placed into new containers(boxes, bags). Master boxes are labeled for traceability. Product is sold mainly to retail, groceries, and food service. The facility operates 12 months with 30 workers(10-repack, 20 in storage/distribution). Most product is picked up by customers and the facility ships on 7 company-owned trucks. Observed multiple stored commodities while on site such as onions, potatoes, herbs, berries, citrus, broccoli, greens, cabbage, carrots, cucumbers, peppers. Pest control as follows: Terminal market-exterior-Anderson, company owned space-Ecolab, Re-pack rented space, Anderson. There is no washing or processing of product and there are no critical control points associated with the HACCP program.
